EDUCATION

2024 • 2025 **Private Master in 3D Animation and Virtual Reality**
Techtitute

- Specialized in immersive design and advanced visual storytelling, applying these skills to both 3D modeling and animation.
- Gained experience in creating high-quality visual assets for digital and interactive platforms, while integrating design principles into immersive environments.
- Developed expertise in visual communication techniques that translate across various mediums, enhancing my ability to create visually engaging designs.

2022 • 2025 **Udemy**
Online Courses

- Completed a series of certifications in 3D design, digital content creation, and visual design tools, gaining proficiency in Adobe Creative Suite (Photoshop, Illustrator, InDesign), Blender, and Maya.
- Deep focus on creating visual assets for both gaming and graphic design, improving my 3D modeling, texturing, and design skills to produce high-quality digital assets.
- Evolved advanced techniques in graphic design and animation, ensuring my work is both visually compelling and functional across diverse projects.

CERTIFICATIONS

2025 **Master 3D Animation and Virtual Reality**
TECH Global University - Master
***Duration**: 1800 hours (equivalent to 60 ECTS)*
***Grade Point Average:** 9.3/10*

- 3D Industry & Advanced Techniques: Asset creation, advanced modeling, and texturing.
- Game Development: Proficiency in Unity 3D, artificial intelligence, and immersive VR/AR design.
- Animation: Rigging, facial animation, motion capture, and character development.
- Game Production: Prototyping, mechanics programming, and production pipeline management.
- Audio & VFX: Advanced visual effects and professional audio integration for VR and 3D games.

2024 **Unity** *Pathway - Unity Essentials*

- Achived a foundational course in game development with Unity, focusing on UI design, interactive components (buttons, sliders), and responsive layouts.
- Captured experience in 2D asset creation using the Sprite Editor and enhanced scripting skills for efficient code integration.
- Thrived proficiency in Unity's scene-building, lighting techniques, and GameObject management, ensuring visually dynamic and interactive environments.

2023 • 2024 **Fundamentals of 2D Character Design**
Tech - Diploma university course

- Focused on character creation for animation and gaming, with an emphasis on versatile, high-quality design for both 2D and 3D formats.
- Applied modern design techniques to develop adaptable characters that suit various artistic styles and are effective for both interactive and print media.
- Enhanced my skills in creating dynamic visuals for digital media, building a strong foundation for graphic design across multiple platforms.
